

Mustafa Altuntas

Full Stack Developer

Following my passion I transitioned from ship captain to Full Stack Developer by completing two intensive full-stack JavaScript bootcamp and self studying for two years. I am originally from Turkey and now live in Netherlands. I have a Dutch Residence Permit with a full work permit. I am a lifelong learner and enthusiastic teacher, always looking for opportunities to share my knowledge and learn from others. I really enjoy solving complex problems learning new technology and you can check my projects from Github or my portfolio page .

EDUCATION

Full Stack TypeScript Developer

School of Applied Technology

01/2023 - 04/2023

Amsterdam, Netherlands

Courses

- Completed an intensive 3-month full stack JavaScript training program, excelling in TDD (Test-Driven Development), mob programming.
- Engaged in weekly demonstrations of the previous week's work, presenting to instructors and peers.
- Successfully created two full stack applications during the course, showcasing practical skills and hands-on experience.
- Participated in weekly code reviews, actively engaging with instructors and peers to provide and receive feedback.

Industrial Engineering

Istanbul Technical University (Which is accepted as a Bachelor from IDW)

09/2012 - 07/2016

Istanbul, Turkey

WORK EXPERIENCE

Voxel Art and Programming Intern

The Skynth

01/2022 - 01/2023

Rotterdam, Netherlands

Achievements/Tasks

- Assisted in creating Skynth's website using React, CSS, and HTML.
- Acquired 3D programming skills and applied them to create unique character designs.
- Developed features like automatic color changes using C# in Blender.

Freelance Software Developer

Freelance/Remote

06/2022 - Present

Achievements/Tasks

- Developed custom blog sites for diverse clients in industries such as e-commerce and workplace storytelling as a successful freelance web developer.
- Employed effective communication skills to translate client visions into practical web designs, resulting in visually appealing and user-friendly blog sites.
- Contributed to the growth and success of clients' businesses by providing them with powerful online platforms to showcase their content and engage with their target audience.

SKILLS

React Django JavaScript TypeScript
Express Python C++ Node.js SQL Server
REST Redux Next.js HTML CSS
Bootstrap TailwindCSS Mocha/Jest TDD
Git+Github

PERSONAL PROJECTS

Flyplan (03/2023 - 04/2023)

- Utilized a robust tech stack including ReactJS, Redux, Firebase, ExpressJS, and NodeJS to ensure a smooth and reliable user experience.
- Revolutionized flight search with a visually stunning flight ticket tracker, enhancing the user experience and streamlining the process.
- Developed a unique dashboard allowing users to effortlessly compare prices across multiple flights without the need for multiple tabs.
- Implemented comprehensive features such as flight ticket search, auto-suggest, saving/deleting favorites, filters, authentication, weather information, and price notifications.
