Mustafa Altuntas
Full Stack Developer

I am full stack developer experienced in React, Node.js and JavaScript. I also have some experience with Python and Django. I am originally from Turkey and now live in Terneuzen (ready to relocate). I am a lifelong learner and enthusiastic teacher, always looking for opportunities to share my knowledge and learn from others. I really enjoy solving complex problems and I am great at learning new technologies fast.

TECHNICAL SKILLS

General
React
Django
JavaScript
Typescript
Python
C++

Backend
Node.js
SQL Server
REST

Frontend
React
Redux
Next.js
HTML
CSS/styled-components
Tailwind CSS
Bootstrap

Tools and technologies
Visual Studio Code
Mocha/Jest
Git+GitHub
TDD
Agile work methods

EDUCATION & JOBS

Full Stack JavaScript- School of Applied Technology </salt>
January 2023 – Present

Of over 1000 applicants, I was one of about 60 that got accepted into an intense JavaScript/TypeScript bboot camp moving at a breakneck speed. The training focuses on Mob Programming, Agile development and consists of 500 coding hours with weekly demos and coding tests.

Voxel Art and Programming Intern
The Skynth 2022 - 2023

As an intern at Skynth, a start-up company that created an NFT game, I contributed to the development of the game by designing several unicorn characters. I learned 3D programming in just one week and applied this knowledge to create the characters' unique looks, focusing on color and movement. Additionally, I developed different features for the characters, such as automatic color changes, using C# in Blender - a tool I learned by doing. In addition to my character design work, I also assisted the company in creating their website using React, CSS, and HTML. This experience allowed me to further enhance my skills as a Full-Stack Developer and gain valuable real-world experience in web development.

Clarusway - Full Stack Developer
2021 - 2022

VOLUNTEERING
- Repair Cafe - 2021 – Middelburg (maintenance work for charity)
- Voedselbank – 2021 – Middelburg (gardening)
- Book Profit Foundation - 2021 - Gilze (building furniture for charity)
- SMAAK – 2022 – Haarlem (cooking for homeless people)

Languages
English – Fluent
Turkish - Native
Dutch – Beginner

I participated in the intense Clarusway boot camp

from the USA where I worked daily on various projects to enhance my skills as a Full-Stack Developer. During my 10-month tenure, I developed my abilities to the next level, particularly in the areas of Javascript, Python, React, HTML, CSS, and Django. I am grateful for the opportunity to have joined the Clarusway Bootcamp and to have further developed my skills and knowledge in these technologies.

Front-End Developer
Freelancer - 3 months

As a freelance web developer, I created custom blog sites for clients in various industries, including e-commerce and workplace storytelling. I collaborated closely with clients to identify their specific requirements and delivered customized solutions that met their needs

Flyplan
 Revolutionizing the way users search for flights by developing a visually stunning flight ticket tracker. Our innovative solution enables users to easily compare prices across different flights without the hassle of having multiple tabs open. By providing a unique dashboard, users can customize their preferred options and effortlessly track multiple flight options. In addition to our core features, we plan to incorporate an even more exciting functionality. Users will have access to weather information for their searched location and receive price change notifications for saved flights. With our comprehensive set of features, including flight ticket search, auto-suggest, saving/deleting favourites, filters, authentication, weather information, and price notifications, FlyPlan is the ultimate flight tracker. Our tech stack includes ReactJS, Redux, Firebase, ExpressJS, and NodeJS, ensuring a smooth and reliable user experience.
I would love to see you there, help you find a cheap flight ticket and organize them
